CHANGING THE

WORLD...

ONE CHILD

AT A TIME

An international, nonprofit organization that provides needed quality medical care for underserved children throughout the world and advances medical skills and resources in developing countries.

## ABOUT US

**Healing the Children** (HTC) is one of the oldest and largest non-governmental, humanitarian, volunteer-driven charities in the nation. HTC partners with American and International healthcare providers to help underserved children around the world secure quality medical care otherwise unobtainable.

## OUR VISION

**Healing the Children** envisions a world where every child has access to quality medical care. We have 14 chapters (serving 19 states) across the US supported by our national office.

HTC is proud to have been helping children around the world access the health care they need and deserve since 1979.

## MEDICAL TEAMS ABROAD

The **Medical Teams Abroad** (MTA) program works at the invitation of the host country.

**Surgical Teams** work in the local hospitals and clinics along with the local healthcare providers to provide surgical services not available in-country and to train local healthcare professionals in new medical techniques for the sustainability of services.

**Surgical Teams** include orthopedic; podiatry; ENT (ear, nose, and throat); cleft lip and palate; burns; urology; neurosurgery; plastics and reconstruction; and ophthalmology.

**Non-Surgical Teams** provide children with access to donated health care and resources.

**Non-Surgical Teams** include audiology; dental; dermatology; speech therapy pathology; family medical; educational; pre-surgical screenings; and adaptive equipment.

## INTERNATIONAL INBOUND

The **International Inbound** (IIB) program is our founding program. Children from around the world are referred to HTC when it is determined that their medical conditions cannot be treated in their home countries. HTC works with international partners, hospitals, doctors, and volunteer host families to bring the children to the US for donated medical care.

## LOCAL/US BASED

Our **Local** programs assist children here in the US to acquire medical care, medicines, equipment, and other related needs that fall through the cracks of our existing insurance and social services programs.

## EDUCATION AND TRAINING

HTC volunteer medical professionals work alongside in-country health care personnel to offer **education and training in best practices** to increase their skills and techniques.

HTC is partnering with Ohana One to utilize Vuzix Surgical Glasses in **cross-training/consultation** with international surgeons and doctors. HTC is also exploring new medical techniques and software applications to facilitate quality health care.

## SPECIAL PROJECTS

**Special Projects** occur both locally and globally to meet the health care needs for children and their families in a holistic approach. **Special Projects** include donations of medical equipment and supplies; construction of medical clinics; renovations in hospitals; sponsorships for camp; awareness events; nutrition support; and water projects.

## INTERNATIONAL MEDICAL ASSISTANCE

**International Medical Assistance Program** (IMAP) uses collaborative contacts to find medical care for a child in a country closer to where he/she lives.
